

# Extra support for your T1D patients

**Blue Circle Health is a nonprofit organization that provides free, supplemental care, education and support for adults living with T1D.** Our **virtual program** serves as an **extension of a patient's existing care team.** Throughout the **six-month program**, we keep our patients' care teams apprised of progress and refer back to them for in-person care and all non-T1D concerns.

## We offer:

- **Clinical care:** extra support with insulin adjustments, T1D medication/supply refills, and can serve as a stop gap for those transitioning care or in between appointments
- **Insurance navigation:** coverage and benefits, enrollment and prior authorization support
- **Financial assistance:** a Prescription Assistance Program for qualifying individuals unable to afford their medication and supplies and an Intro to CGM trial program
- **Education and nutrition support:** help patients learn about managing glucose levels with insulin, carb counting, and how to use diabetes devices
- **Social work services:** help with other life challenges that can impact T1D health like housing, food and employment concerns
- **Diabetes supportive counseling:** help patients navigate the unique emotional stressors associated with T1D, and refer to other behavioral health services
- **Peer support:** one-on-one support from T1D Support Guides to answer questions between office visits and help patients reach their goals

**Visit [bluecirclehealth.org](https://bluecirclehealth.org) to learn more, refer patients, and download resources.**

**"By collaborating with Blue Circle Health, providers can enhance the quality of care and support for their T1D patients."**

**MEGAN COX, RN, BSN, CDCES**  
Treasure Coast Community Health

We believe that together, we can improve health outcomes and equip people with T1D with the education and tools they need to thrive.

**Now available in:**  
**Florida, Maine & Vermont**

\*expanding to more states soon!
